FOR IMMEDIATE RELEASE

SCIL OFFERS EXCLUSIVE LIVER AND KIDNEY PANELS FOR SPOTCHEM® EZ

New Panels Check Healthy Liver and Kidney Functions

Chicago, Illinois, September 9, 2011 — scil animal care company, inc., a global organization focused on providing high quality veterinary diagnostic, surgical and radiography products is proud to announce new pre-anesthetic testing panels for the scil Spotchem® EZ Chemistry Analyzer. scil animal care is the exclusive distributor for the new Vital Health Liver and Kidney Panels to the North American veterinary market.

The scil Spotchem® EZ currently offers the industry-favorite Vital Health Panel, or Panel V (BUN, CRE, ALT, ALP, GLU, TP), and 21 analytes including Fructosamine. scil now exclusively offers two new panels from the manufacturers of the Spotchem® EZ. The Vital Health Liver Panel offers the tests you need to check healthy liver functions in one convenient panel. It features analytes ALP, AST, ALT, Total Bilirubin, and Total Protein. The Vital Health Kidney Panel also features the crucial tests needed to check healthy kidney functions. This panel includes Calcium, Blood Urea Nitrogen, Glucose, Albumin and Creatinine.

scil is proud to expand their partnership with ARKRAY USA. They are a global manufacturer of clinical chemistry, urine chemistry and blood glucose products and the manufacturers of the Spotchem® EZ. scil began the partnership in November of 2009 by re-launching the Spotchem EZ® Chemistry Analyzer to the veterinary industry. The Spotchem® EZ was a much-anticipated new product offering for scil that responded to the customer's need for a better, faster and more cost-effective chemistry analyzer. scil recently launched the new scil Spotchem® EL Electrolyte Analyzer, also from ARKRAY USA, which is capable of measuring sodium, potassium and chloride in just 60 seconds. Expanding on an already strong partnership is exciting for scil, and will surely bring even more value to the North American practitioner who relies on their in-house diagnostic lab for fast, accurate results at a low-cost-per-test.
